Professional summary:

I study how climate variability and extremes interact with agriculture. I am interested in understanding the impacts of climate extremes such as temperature, rainfall, droughts, and compound extremes on agriculture. I am also interested in measuring and disentangling the effects of different climate forcings on observed climate trends.

Education:

PhD Student – Climate impacts on Agriculture (2024 – Present)
Geography and the Environment Department, Syracuse University, New York, USA
Master of Science in Business Analysis (2016)
The Catholic University of America (CUA), Washington, DC, USA
Bachelor of Arts in Economics, Minor in Mathematics (2014)
Gustavus Adolphus College, Saint Peter, Minnesota, USA

Research and professional experience:

PhD Student – Climate impacts on agriculture (2024 – Present)
Geography and the Environment Department, Syracuse University, Syracuse, USA
Research Assistant and Teaching Assistant – NSF-funded project with Dr. Ethan Coffel

- Investigate the interactions between agricultural intensification and climate change and extremes across US and global croplands.
- Separate the signals of climate forcings from natural variability to advance understanding of climate trends and impacts in agriculturally intensive regions.
- Build workflows in R/Python to integrate, process, and analyze large agriculture, in situ, climate reanalysis, and climate model datasets.
- Serve as Teaching Assistant for GEO 155 (The Natural Environment) and GEO 215 (Global Environmental Change): lead weekly discussion sections, hold office hours, and grade exams and quizzes.

Alliance of Bioversity International and CIAT, Hanoi, Vietnam **(2017 – 2024)**
Statistical Modeler (2020-2024)

- Developed statistical models and risk maps to assess the impacts of climate across cropping regions in Asia, Africa, South America, and Oceania.
- Assisted the development of compound risk framework, assessing the vulnerability of several targeted countries.
- Contributed to the development of the climate resilience platform, informing clients and partners on historical and projections of climate impacts and potential adaptation practices.
- Prepared analyses and technical briefings for partners, supporting communications of results and recommendations to decision makers.

Assistant for Statistics and Data Management (2017 – 2020)

- Digitized survey instruments in CSPro software and trained enumerators in tablet and smartphone-based data collection processes.
- Streamlined data collection, cleaning, management, and analysis approaches for various research projects in agriculture, climate, socio-economic, crop systems and nutrition.
- Conducted statistical analyses supporting peer-reviewed publications and technical reports.
- Implemented FAIR and open access data management standards, curating and publishing datasets to online open repositories.
- Trained research staff in data analysis workflows and data management standards.

Presentations:

Nguyen, K., & Coffel, E. (2026, December 7). Quantifying Crop Production Impact on Evapotranspirative Cooling in the US Breadbasket. In *GC14D: Implications of Climate Change for Global Agriculture: Impacts, Adaptation, Mitigation* [Oral]. AGU26 Annual Meeting, San Francisco, United States.

Nguyen, K., Basel, A., Pham, G., Nguyen, N., Talsma, T., & Craparo, A. (2026, December 7). Warmer Nights Negatively Impact Global Potato Production. In *GC13L: Data, Methods, and Applications for Understanding Climate Impacts on Global Agriculture* [Poster]. AGU26 Annual Meeting, San Francisco, United States.

Nguyen, K., Coffel, E., & Mankin, J. S. (2025, December 15). Evaluating observed and modeled wet-bulb temperature trends over global croplands. In *GC22D - Implications of Climate Change for Global Agriculture: Impacts, Adaptation, Mitigation* [Oral]. AGU25 Annual Meeting, New Orleans, United States.

Pham, G., Nguyen, P., **Nguyen, K.**, Anders, S., & Talsma, T. (2023, September 12). Driver of Vietnamese coffee farmers' climate change adaptation. In *Session 5 - Climate change - Sustainability - Labels* [Poster]. The 29th ASIC Conference on Coffee Science, Hanoi, Vietnam.

Awards and Grants

Maxwell Dean's Research Award (2025, 2026)
Syracuse Geography and the Environment's Monmonier Award (2024)
Maxwell School of Citizenship and Public Affairs' Perryman/East Asia Research Grant (2024)

Skills and Competencies:

- Programming: R, Python, MATLAB, JavaScript
- Software: QGIS, ArcGIS Pro, Google Earth Engine, PowerBI, Tableau, CSPro
- Languages: Vietnamese (native) and English (fluent)

Trainings and Conferences

American Geophysical Union (AGU), San Francisco, CA, USA – Oral presenter (2026)
Machine Learning for Earth Systems Modelling (ECMWF's 3 course series, 2026)
American Geophysical Union (AGU), New Orleans, LA, USA – Oral presenter (2025)
Mastering Randomized Controlled Trials, Ho Chi Minh City, Vietnam – Participant (2023)
29th ASIC Conference on Coffee Science, Hanoi, Vietnam – Poster presenter (2023)
CGIAR Big Data in Agriculture Convention, Hyderabad, India – Participant (2019)
International Workshop on Advanced R and R-QTL, Hyderabad, India – Participant (2018)
CGIAR Big Data in Agriculture Convention, Nairobi, Kenya – Participant (2018)
Workshop on Data Storytelling and Visualization, Hanoi, Vietnam – Co-organizer (2017)
